

Myboard™ Product Sheet and Order Form

Myboard™ is the ideal classroom management system for ANY interactive whiteboard.

Features:

- ✚ Provides a working platform that can be used throughout the day
- ✚ Attendance details are easily recorded in a fun way that allows for instant interactivity with the board
- ✚ Attendance information is easily exported and presented
- ✚ Daily, weekly and term tasks can be assigned, read and recorded
- ✚ Timetable
- ✚ Reminder list
- ✚ Easily created groups
- ✚ Multiple templates to suit any class
- ✚ Minimal teacher input yet maximum reward

The program's functionality allows students to record their attendance on entering the room by just moving their image, avatar or silhouette from the scroll area to the main interface. On departing the room students just drag their image back to the scroll area thus recording the time of leaving class. Teachers are able print off the attendance history of any student or class. This information can be sent over email and is password protected thus providing a serious attendance record for any school.

The interface allows students to view the timetable and subject description on any day through a calendar view option. Students can click on their image to view personal tasks for the day, week or term. Reminders can be viewed by clicking on the named tab thus showing reminders for any date. Groups can be managed by clicking on the group/sort tab. These groups can be made by the teacher or students through a simple wizard or by fun, interactive activities. All groups can be saved and used again. A range of clocks are made available including a class stop watch and age appropriate options.

Unlimited Site Licence - \$1,490 (inc gst) or \$149 single licence (inc gst)

The weather wizard enables students to drop and drag the day, date and temperature as a great activity to start the day for younger students. For older students a simple function of adding the daily temperature allows it to be presented on the interface for the day.

Everyday, classroom students have their duties listed including feeding the fish or fetching the lunch orders. Once completed students can tick off their task, showing a yellow tick on the student image, giving the teacher a clear indication of which student has completed their task.

Feedback is that this is one the most simple yet helpful product teachers have seen. The revelation is that it is a product that will save teachers and students time rather than give teachers another product they have to spend time to learn.
